|   | Stanley W. Johnston , Gerald A. Acquaah-Gaisie<br><b>Selected papers from the second Australian Institute conference on Computer ethics - Volume 1</b> November 2000                |     |
| The Internet is permeating our lives because of its power. This brings obvious social and economic value. Less obvious are the social and economic hurts. The Net's reach is global, but Net access is far from global; and as the IT caravan rolls on, stragglers slip further behind. However, the Net is a cheap power just made for isolated people, and thus it offers access to an unprecedented equality of opportunity. Women have equal access. But the already poor do not. Equity here raises questions of ... |   |     |
| <b>5</b>  | Technical Session: You can't build a bridge without a solid foundation  | 77% |
|   | Kathleen Cummings Topalian<br><b>Proceedings of the 29th annual conference on University and College Computing Services: Fall User Services Conference - Volume 29</b> October 2001 |     |
| Rolling out an administrative system in a decentralized business model can easily produce a result that is both a technical success and public relations failure. This paper will revisit the two systems rollouts at Tufts that inaugurated a support, training and communications   |   |     |

strategy that reinforced a new way of doing business in an academic environment. The Tufts' solution is a directorate that owns support, training, documentation and web services. Together, it is supported by the communicatio ...
